State Finished

Completed on Wednesday, 16 September 2020, 12:37 PM

Time taken 22 mins 54 secs

Grade 49.00 out of 50.00 (98%)

Question 1

Complete

Mark 1.00 out of 1.00

You can insert a synchronization point that instructs the UFT for GUI Testing tool to wait until the Update Order button is enabled.

Select one:

- True
 False

Question 2

Complete

Mark 1.00 out of 1.00

You can insert a synchronization point, which instructs the UFT for GUI Testing tool to pause the test until an object property achieves the value you specify.

Select one:

- True
 False

Question 3

Complete

Mark 1.00 out of 1.00

Input parameter names and their values are located in the Data Table.

Select one:

- True
 False

Question 4

Complete

Mark 1.00 out of 1.00

XML checkpoint checks the data content of XML documents.

Select one:

- True
 False

Question 5

Complete

Mark 1.00 out of 1.00

You can not delete objects from the object repository.

Select one:

- True
 False

Question **6**

Complete

Mark 1.00 out of 1.00

Enables you to define a new internal environment variable and add it to the list.

Select one:

- a. Add
- b. File
- c. Export
- d. Load

Your answer is correct.

Question **7**

Complete

Mark 1.00 out of 1.00

The most fundamental properties of a particular test object class.

Select one:

- a. Base Creation Time
- b. None of the choices
- c. Base Lifting
- d. Base Identifier

Your answer is correct.

Question **8**

Complete

Mark 1.00 out of 1.00

The View Configuration Options dialog box enables you to define a selected value as a constant or a parameter.

Select one:

- True
- False

Question **9**

Complete

Mark 1.00 out of 1.00

It is a value of a property captured from the the AUT during the test execution.

Select one:

- a. Input Parameter
- b. Test Parameter
- c. Output Parameter
- d. Parameter

Your answer is correct.

Question **10**

Complete

Mark 1.00 out of 1.00

Input parameters enable you to replace a static recorded value in a step with a placeholder for a dynamic value.

Select one:

- True
- False

Question **11**

Complete

Mark 1.00 out of 1.00

Table checkpoint checks the property values of an image.

Select one:

- True
- False

Question **12**

Complete

Mark 1.00 out of 1.00

Test object name is the test object class of the selected object.

Select one:

- True
- False

Question **13**

Complete

Mark 1.00 out of 1.00

All test objects are stored in the object repository.

Select one:

- True
- False

Question **14**

Complete

Mark 1.00 out of 1.00

Synchronization is used to instruct UFT for GUI Testing to wait for the application process to complete before proceeding to the next step in the test.

Select one:

- True
- False

Question **15**

Complete

Mark 1.00 out of 1.00

Class is the selected name of the selected object.

Select one:

- True
- False

Question **16**

Complete

Mark 1.00 out of 1.00

You can check the object property values in your application using standard checkpoints.

Select one:

- True
- False

Question **17**

Complete

Mark 1.00 out of 1.00

Optional Filter properties is the other properties that can help identify objects of a particular class.

Select one:

- True
- False

Question **18**

Complete

Mark 1.00 out of 1.00

It matches one to any number of occurrences of the preceding character.

Select one:

- a. digits
- b. Period
- c. asterisk
- d. Plus

Your answer is correct.

Question **19**

Complete

Mark 1.00 out of 1.00

Special character Period in UTF matches any single character.

Select one:

- True
- False

Question **20**

Complete

Mark 1.00 out of 1.00

When you run a test, your application might not always respond with the same speed.

Select one:

- True
- False

Question **21**

Complete

Mark 1.00 out of 1.00

Constant is a value that is defined or generated externally and is retrieved during a run session.

Select one:

- True
- False

Question **22**

Complete

Mark 1.00 out of 1.00

This is the identifier which object appears within the frame or dialog box.

Select one:

- a. Index
- b. None of the choices
- c. Creation Time
- d. Location

Your answer is correct.

Question **23**

Complete

Mark 1.00 out of 1.00

Brackets matches a range of character.

Select one:

- True
- False

Question **24**

Complete

Mark 1.00 out of 1.00

A dynamic checkpoint is a checkpoint that can check for any value generated at run time.

Select one:

- True
 False

Question **25**

Complete

Mark 1.00 out of 1.00

Checkpoints can be inserted even while you are in recording mode.

Select one:

- True
 False

Question **26**

Complete

Mark 1.00 out of 1.00

Regular Expression option enables you to specify a constant value using a regular expressions.

Select one:

- True
 False

Question **27**

Complete

Mark 1.00 out of 1.00

This is the identifier that applicable only to web applications.

Select one:

- a. Creation Time
 b. Location
 c. Index
 d. None of the choices

Your answer is correct.

Question **28**

Complete

Mark 1.00 out of 1.00

The environment variable xml file to load and use when your test runs.

Select one:

- a. File
 b. Type
 c. Load
 d. Name

Your answer is correct.

Question **29**

Complete

Mark 1.00 out of 1.00

You can add an object to the object repository directly from the Object Spy.

Select one:

- True
 False

Question **30**

Complete

Mark 1.00 out of 1.00

It checks the contents of a data based accessed by an application.

Select one:

- a. Database Checkpoint
- b. Data Application
- c. Data
- d. Database

Your answer is correct.

Question **31**

Complete

Mark 1.00 out of 1.00

Environment parameters enable you to insert a value in the test from an environment variable list.

Select one:

- True
- False

Question **32**

Complete

Mark 0.00 out of 1.00

To update an object, perform the following steps:

Select one:

- a. Open the object repository
- b. All of the choices
- c. In the Object Repository Toolbar, click the Compact View icon
- d. The object Repository window is resized and only the object tree pane is visible. To expand the Object Repository window again, click the Compact View icon again.

Your answer is incorrect.

Question **33**

Complete

Mark 1.00 out of 1.00

Base Filter properties is the most fundamental properties of a particular test object class.

Select one:

- True
- False

Question **34**

Complete

Mark 1.00 out of 1.00

Names and their values are located in the Data Table.

Select one:

- a. Input Parameter
- b. Test Parameter
- c. Parameter
- d. Output Parameter

Your answer is correct.

Question **35**

Complete

Mark 1.00 out of 1.00

Indicates that the value of the property is currently a parameter.

Select one:

- a. Data Checkpoint
- b. None of the choices
- c. Plus
- d. Java

Your answer is correct.

Question **36**

Complete

Mark 1.00 out of 1.00

File content checkpoint check the image in a document generated during a run session.

Select one:

- True
- False

Question **37**

Complete

Mark 1.00 out of 1.00

Text checkpoints the text string is displayed within a defined area in a window based application according to specified criteria.

Select one:

- True
- False

Question **38**

Complete

Mark 1.00 out of 1.00

This is the identifier that indicates the order which the order appears in the application code.

Select one:

- a. None of the choices
- b. Base Filter
- c. Index
- d. Location

Your answer is correct.

Question **39**

Complete

Mark 1.00 out of 1.00

Property name enables you to specify the property value for which UFT for GUI Testing should wait before continuing to the next step in the test.

Select one:

- True
- False

Question **40**

Complete

Mark 1.00 out of 1.00

Indicates that the value of the property is currently an environment variable parameter.

Select one:

- a. Plus
- b. Data Checkpoint
- c. None of the choices
- d. Java

Your answer is correct.

Question **41**

Complete

Mark 1.00 out of 1.00

You can insert a synchronization point that instructs the tool to wait until the Update Order button's enabled property equals.

Select one:

- True
- False

Question **42**

Complete

Mark 1.00 out of 1.00

Run on all rows test with iterations using one rows in the global data table.

Select one:

- True
- False

Question **43**

Complete

Mark 1.00 out of 1.00

It is a checkpoint that can check for any value generated at run time.

Select one:

- a. File
- b. Add
- c. Input Parameter
- d. None of the choices

Your answer is correct.

Question **44**

Complete

Mark 1.00 out of 1.00

Checkpoints include the following type EXCEPT.

Select one:

- a. Java
- b. Database
- c. XML
- d. Bitmap

Your answer is correct.

Question **45**

Complete

Mark 1.00 out of 1.00

You can insert Exist or Wait statements that instruct the UFT for GUI Testing tool to wait until an object exists or to wait a specified amount of time before continuing the test.

Select one:

- True
 False

Question **46**

Complete

Mark 1.00 out of 1.00

Page checkpoint checks the characteristics of a web page.

Select one:

- True
 False

Question **47**

Complete

Mark 1.00 out of 1.00

Run one iteration only using the first row in the global data table.

Select one:

- True
 False

Question **48**

Complete

Mark 1.00 out of 1.00

n Input parameter is the value of a property captured from the AUT during test execution.

Select one:

- True
 False

Question **49**

Complete

Mark 1.00 out of 1.00

Accessibility checkpoint identifies area of a web site to check for section 598 compliancy.

Select one:

- True
 False

Question **50**

Complete

Mark 1.00 out of 1.00

You can modify the default amount of time that the UFT for GUI Testing tool waits for a Web page to load.

Select one:

- True
 False
