State Finished

Completed on Monday, 26 August 2019, 12:35 AM

Time taken 1 min 36 secs

Marks 10.00/10.00

Grade 100.00 out of 100.00

Question 1

Correct

Mark 1.00 out of 1.00

Identify the technique in which a researcher studies the social process as they happen in the field.

Select one:

- a. Observation Method
- b. Registration Method
- c. Questionnaire Method
- d. Experimental Method

Correct

Marks for this submission: 1.00/1.00.

Question 2

Correct

Mark 1.00 out of 1.00

Find the population used if sample size computed is 90 at 10% margin of error

Select one:

- a. 569
- b. none of the above
- c. 900
- d. 999

Correct

Marks for this submission: 1.00/1.00.

Question 3

Correct

Mark 1.00 out of 1.00

Which statement is false?

Select one:

- a. A financial audit report is an example of textual method of presenting data.
- b. Bar Graph is a graph that uses horizontal or vertical bars to represent data. Bars provide a visual display for comparing quantities in different categories or groups.
- c. Tabulation can be classified as special. In this type classification, the data are classified according to place. This includes town, district, state and country.
- d. Line Graph can be used to display changes in sales from 2011-2016.

Correct

Marks for this submission: 1.00/1.00.

Question 4

Correct

Mark 1.00 out of 1.00

Compute for the sample size, given the following data: Population = 1000, margin of error 10%.

Select one:

- a. 91
- b. 100
- c. 199
- d. 99

Correct

Marks for this submission: 1.00/1.00.

Question 5

Correct

Mark 1.00 out of 1.00

Identify a business-related activity which involves experimental method of data collection

Select one:

- a. Market observation
- b. Interview of customers
- c. Sales data collection
- d. Test market

Correct

Marks for this submission: 1.00/1.00.

Question **6**

Correct

Mark 1.00 out of 1.00

Which statement is false?

Select one:

- a. Stratified Random Sampling can be used when the members of the population belong to the same category, class or group.
- b. Quota sampling is similar to stratified random sampling. The only difference is that the selection of sample using quota sampling is not done randomly.
- c. Lottery Method is a form of simple random sampling.
- d. In Systematic Sampling, sample units are obtained by drawing every n th element of a series representing a population.

Correct

Marks for this submission: 1.00/1.00.

Question **7**

Correct

Mark 1.00 out of 1.00

Find the margin of error used if sample size computed is 50 at and population is 100.

Select one:

- a. 0.1
- b. none of these
- c. 0.05
- d. 0.01

Correct

Marks for this submission: 1.00/1.00.

Question 8

Correct

Mark 1.00 out of 1.00

Which method is the most time consuming?

Select one:

- a. Questionnaire Method
- b. Interview Method
- c. Registration Method

Correct

Marks for this submission: 1.00/1.00.

Question 9

Correct

Mark 1.00 out of 1.00

If sample size is 5,000, when margin of error is 1%, what is the size of the population?

Select one:

- a. 500,000
- b. 50,000
- c. 10,000
- d. 100,000

Correct

Marks for this submission: 1.00/1.00.

Question **10**

Correct

Mark 1.00 out of 1.00

Census of population is an example of

Select one:

- a. Registration Method
- b. Questionnaire Method
- c. Observation Method
- d. Experimental Method

Correct

Marks for this submission: 1.00/1.00.
