

**LESSON PLAN IN SCIENCE
GRADE 8**

CONTENT STANDARDS: The learners demonstrate an understanding of the

1. concept of a species.
2. The species as being further classified into a hierarchical taxonomic system.

PERFORMANCE STANDARDS: The learners should be able to report on activities that communities engage in to protect and conserve endangered and economically important species.

LEARNING COMPETENCY/COMPETENCIES:

1. Classify the concept of a species.
2. Classifies organisms using hierarchical taxonomic system.
3. Explain the advantage of high biodiversity in maintaining the stability of an ecosystem.

I. OBJECTIVES

At the end of the session, the students are expected to:

1. Compare and contrast kingdom archaebacteria and eubacteria using a table.
- 2.

II. CONTENT

Topic – BIODIVERSITY

Subtopic: Domain Bacteria: Kingdom Eubacteria

III. LEARNING RESOURCES

Learner’s Module pp. 223-228

IV. PROCEDURES

A. Routinary Activities

1. Putting class in order.
2. Opening Prayer
3. Greetings
4. Checking of Attendance

B. Elicit

Kingdom	ARCHAEBACTERIA	EUBACTERIA
Cell wall		
Multicellular/Unicellular		
Main Types/Group		
Age		
Habitat		

C. Engage

The class will be divided into three groups. They will be given a set of bacterial images and match it with its corresponding shape.

D. Explore

The teacher will show a PowerPoint presentation about the three Phyla under Domain Bacteria: Kingdom Eubacteria

E. Explain

Guide Questions:

1. What is kingdom eubacteria?
2. Give the three phyla under domain eubacteria.
3. List 3 examples of microorganisms under each phyla.

F. Elaborate

What do you think are the harmful and beneficial effects of bacteria to humans? Kindly give examples based on your daily life.

Example: drinking of Yakult – it contains lactobacillus which is a good bacteria that helps in digestion

G. Evaluate

Directions: Identify whether the following statements are true or false.

1. The cell wall of bacteria is made up of peptidoglycan.
2. Bacteria are used in industries for making products such as yogurt and cheese.
3. Some diseases are caused by bacteria such as anthrax and leptospirosis.
4. Bacteria are the least abundant prokaryotes.
5. When oil glands swell and result to pimples, it is infected with *Propionibacterium acnes*.

H. Extend

Directions: Answer the following questions in your notebook.

1. What is domain eukarya?
2. List the kingdoms under domain eukarya.
3. Give atleast five organisms under each kingdom in the domain eukarya.

V. REMARKS

VI. REFLECTIONS
