

## About the role:

- Work in small cross-functional teams, collaborating owning your deliverables
- Use good agile practices to evolve ideas from concept to story to reality
- Work towards goal architecture, with high coding standards, test practices
- We need the kind of developers that are passionate about learning, that go home at night and read blogs, try new technologies and frameworks, to continuously improve their skills and abilities.
- Can easily handle ad-hoc requests and understand fast changing requirements
- Independent progressive workflow

## Technical Requirements:

- 3-5+ years of direct involvement with mobile development in a web-scale production environment
- Deep understanding of hybrid apps (Native, HTML5)
- A deep familiarity with Swift Experience working with iOS frameworks such as Core Data, Core Animation, Core Graphics and Core Text
- Good knowledge about real time application XMPP, MQTT or WebSocket big plus
- Responsibilities Design and build advanced applications for the iOS platform Collaborate with cross-functional teams to define, design, and ship new features.
- Unit-test code for robustness, including edge cases, usability, and general reliability.
- Work on bug fixing and improving application performance.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.
- Have published one or more iOS apps in the app store
- A portfolio of multiple apps, preferably transaction-based business critical apps for reputable companies.
- Experience and understanding of large and complex code bases and architectures.
- Outstanding skills with Swift is a must have, used in projects.
- Strong UX/UI design exposure and experience in making apps work intuitively and with pixel perfect interfaces.
- Strong CS fundamentals (with competencies in algorithms and data structures).
- Highly accountable and takes ownership, with collaborative attitude, and a lifelong learner.
- Experience with third-party libraries and APIs
- Working knowledge of the general mobile landscape, architecture, trends, and emerging technologies
- Solid understanding of the full mobile development life cycle.
