2. Narrate a personal experience of globalization. Attach pictorials of the places you have gone and activities done.

Everyday is an opportunity for oneself to learn. Globalization has influenced me through time, it may be at home, at school or in the society. The use of gadgets have been one of my favorite, before it was only television that we are enjoying to do but right now gadgets have been used as a channel for communication, entertainment and education. Transportation has a great influence towards time. In my own experience, it is time consuming when you only ride on a bicycle and only walk on foot. But in these time, the use of vehicles such as cars, ship, airplanes, you can already be there for about an hour, a day in your desired destination. When I was in high school we had our tour to albay and I have experienced to travel through land and sea. From that time on, I realized how useful are these things.
