**A Reflection about Open Door Rescue in Philippines**  
**Jewish Refugee from Holocaust.**

Jewish Holocaust was a big part of the history. Nazi leader Adolf Hitler act of racism put a big devastation in the Jewish community. Holocaust survivor shares their sad and tragic experience as during those times.

Nazis discriminated against the Jewish people living around Hitler's area of territory. Where some embedded laws deprived Jewish children from going to school, having pets or having a bicycle to ride on. It was an absurd solution on their belief that Jewish are the problem that needed to be removed. Where Hitler called it "The Final Solution" or the mass killings of the Holocaust, where today we call it "ethnic cleansing".

Jewish people were sent to concentration camps and faced the worst persecution. Nazis persecution of the Jewish became a genocide. Millions of Jewish people murdered at the hands of Nazis and their allies, and it happened only for 4 years. All countries close their doors during this event but suddenly there's this one country that helps these Jewish people.

The Philippines helped the Jewish community to vanish from the country where Adolf Hitler reigned. The Frieder brothers and former Philippine President Manuel Roxas welcome refugees. For President Manuel Quezon, barring refugees was not right because he believed the sanctity of human life and the right of people to live life as Jewish people believed they should.

Even though there are wars, invasion happened during this time but it didn't stop them from accepting refugees. Funds for refugees are still a problem but the Frieder brothers found a way to raise funds and also there are people who helped. Play pokers also gave great help for the Jewish refugees. Holocaust was a devastating event, poor human souls persecuted and murdered just because of a crooked belief that they are a problem and the only solution is to eradicate them.

Sometimes, humans get so overwhelmed with having great powers and things we are capable of doing. We are not thinking that it could create grave danger to yourself and other people. Humans often forget that we are all equal whatever race we belong to, we are all the same human beings who have hearts that help to pump blood all over our veins. It is not about religion, it is not about race, it is not about the skin color or the face that fits the ethnicity you belong to. It is about believing that life is the most precious and wonderful gift we have and it helps us to discover our own sanity.
