»»» Personal experience

- When I started to join Mercado Libre, I was introduced by a friend, at first I was also skeptical, I chose to trust my friend and invested \$300 with an attitude of hope, when I worked in Mercado Libre for 7 days, I had earned about \$100, I tried to withdraw my money and soon I received a payment from Mercado Libre.
- When I continued working for a few more days, my friend told me that I was bringing him extra income because I was working every day, and I consulted with my friend and Mercado Libre customer service to understand this, so I had an idea about creating a team, because I knew that no matter what I do, I can never succeed alone, and I recommended Mercado Libre to my friends and family, and although some of them were skeptical, their concerns were undoubtedly allayed when they saw my income statements at Mercado Libre.

In less than half a month, the number of people in my team had increased significantly, which made me feel happy because my hard work had not been in vain. While I was working on this, I also developed my goal to reach out to social networks, Facebook, WhatsApp, telegarm, etc.

»»» Personal experience

I often posted explanations about the Mercado Libre workflow and received a lot of attention and more members joined my Mercado Libre team!

Now that they have been working for Mercado Libre and growing the team, I have received many private messages from the team, most of them thanking me for introducing them to Mercado Libre and giving them an extra income and security in this epidemic.

This is some of my personal experience after becoming a Mercado Libre agent, I hope it will help the users on Mercado Libre.
