

The tool I used is wimax turbo tools v3 by **yyyxyyyz** still the master of the universe! So credit kay bossing **yyyxyyyz**

So let's start!

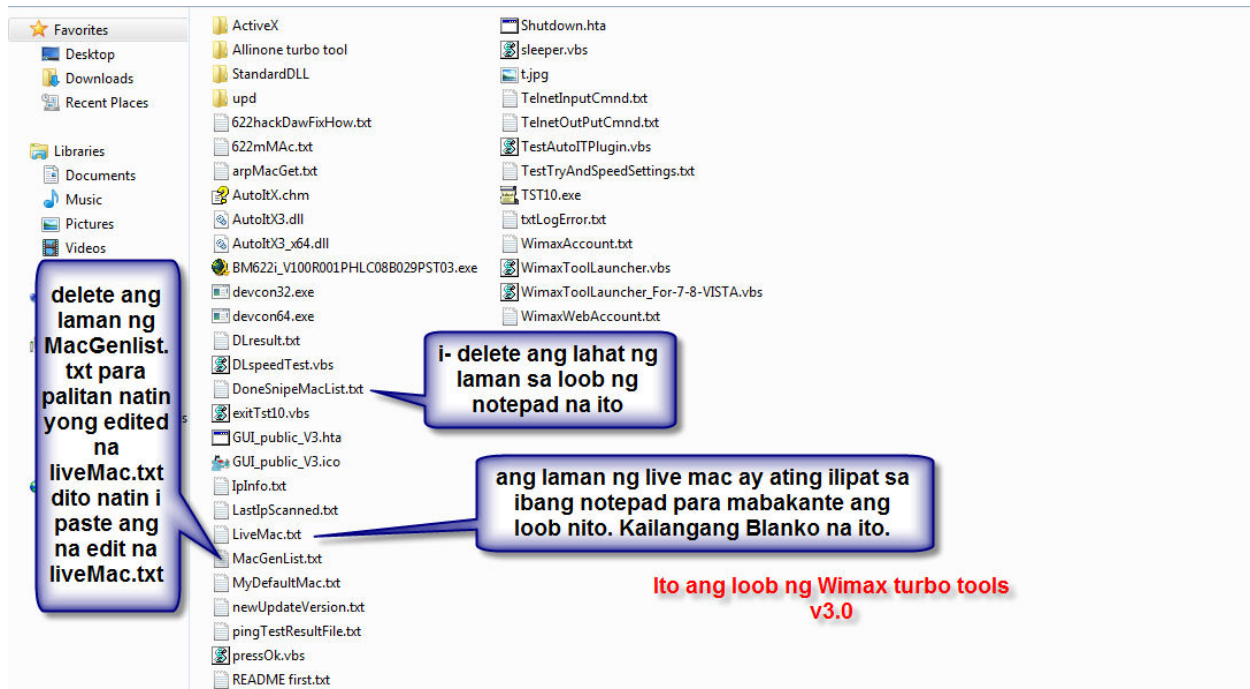

First copy your wimax tools v3 into another folder. Kailangan isolated sya kasi gawin mo lang sya pang recheck ng mga Mac na na-snipe mo kung buhay pa ba o hindi na. Example gawa ka ng new folder ang pangalan ay Wimax Tools Mac rechecker. Dyan mo ipasok lahat ng copya mo sa wimax. Bale maging dalawa na ang wimax turbo tools mo sa desktop ang isa pang snipe ang isa ay pang recheck lang ng mga na snipe mo. (dito rin malaman kung stable ba ang mac na na-snipe mo kung after 1 month tapos recheck mo andoon pa rin sya sa liveMac list hihihi). See picture below sa ginawa kung folder.

Ito ang sample na ginawa kong folder sa Desktop ko.

Note: ang laman ng dalawang folder na iyan ay same lang ginawa ko lang dalawa kasi pag mag recheck ka kailangan burahin mo ang laman ng **DoneSnipeMacList.txt , **LiveMac.txt** at **MacGenList.txt** notepad sa Mac rechecker**

Now ipakita ko ang laman ng folder ng Mac Rechecker ay ito

Ok sana malinaw na sya sa inyo. Now kunin natin yong live Mac list na na-snipe nyo na kahit luma na para ma recheck natin kung ano na lang ang natirang buhay pa. Take note kailangan ihiwalay ang old Mac at new Mac Series sa checking na ito. In my case ang ginamit kong pang recheck ay ang BM622m ko kaya ang procedure sa pag register ay same pa rin sa pag snipe using BM622m like below pics

1. select modem (kung anong gamitin mo pang recheck)

2. click mo ang load default setting

3. click register DLL may pop-up na lalabas choose na lang kung anong O.S ka

4. Click save setting

Under naman sa web/extra setting tick nyo na lang ang default both admin at user then click save web setting

After nyan balik tayo sa mga liveMac list mo na na scan mo before o collection mo (note again *ihwalay ang old at new series pls.*). Para ma-check kung alin pa ang buhay. Ang picture sa baba ay ganyan ang mukha ng liveMac snipe mo.

```

Re check LiveMac.txt - Notepad

```

Ito na ang laman ng MacGenList mo. Ito ay galing sa live macs na naipon mo at eni-edit mo lang para sa na uli ang i-snipe ni wimax tools.

This time kailangan blank na ang liveMac.txt mo at DoneSnipeList. Txt mo like picture below

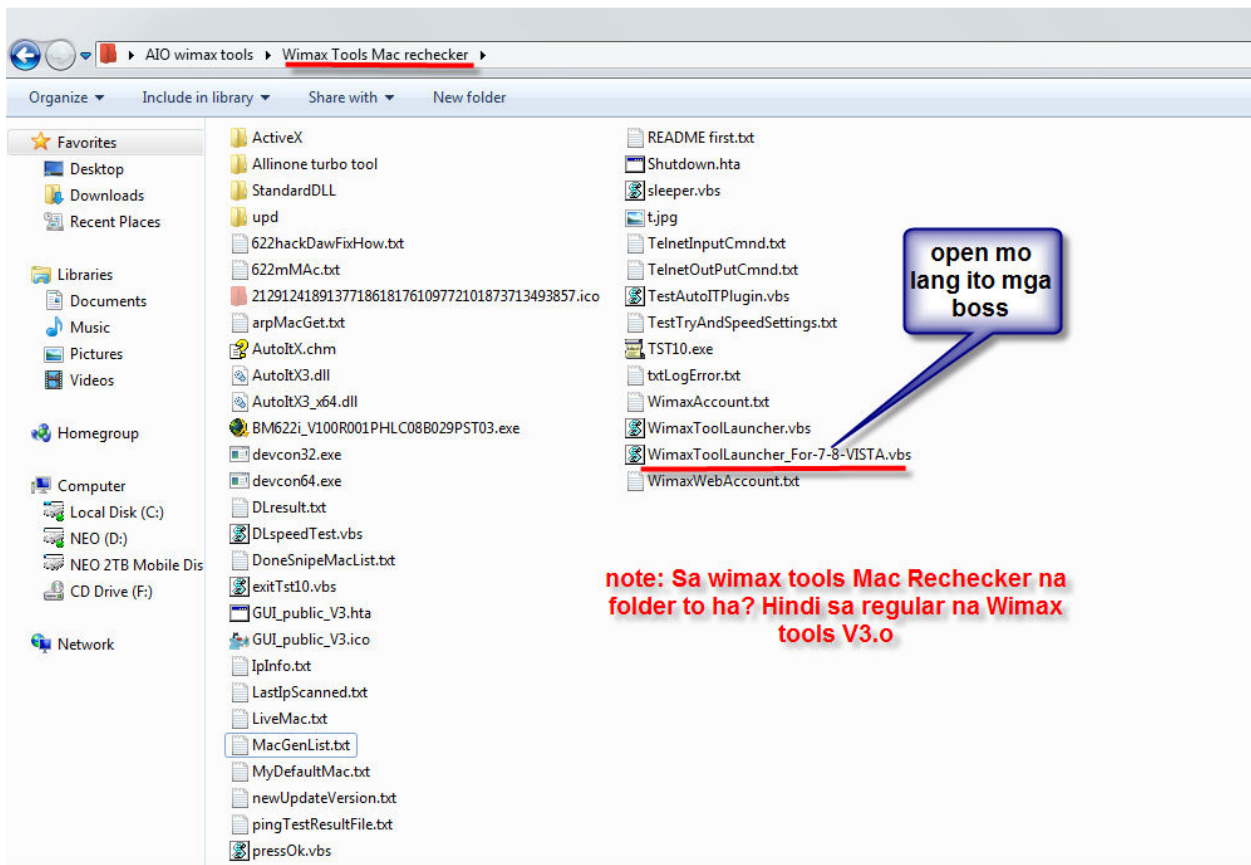

```
DoneSnipeMacList.txt - Notepad
File Edit Format View Help

Kailangan burado to kasi pag di mo binura ang na snipe mo before ay di na nya basahin uli pero need natin sya ipabasa uli di ba? So kailangan blank na ito ok.
```

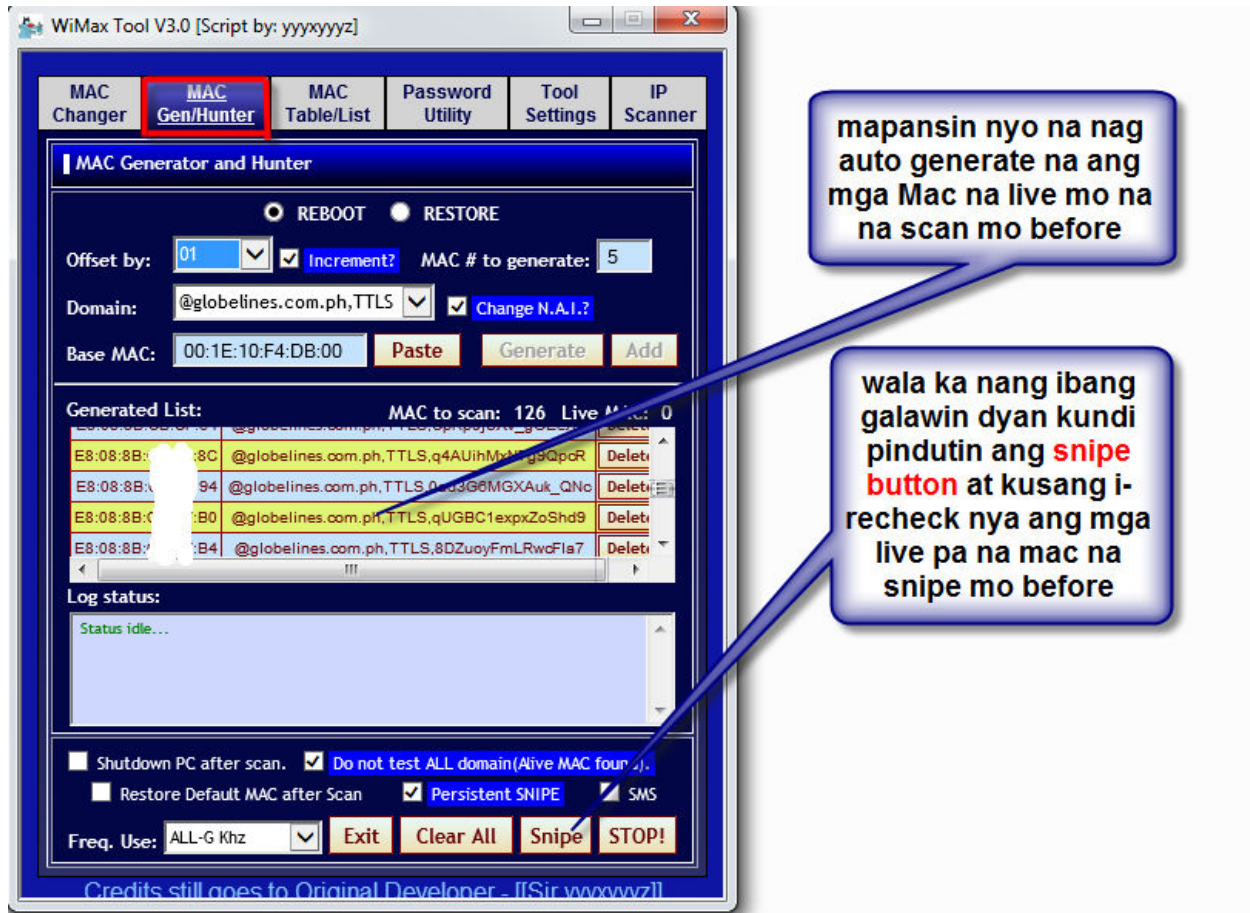

Kailangan burado to kasi pag di mo binura ang na snipe mo before ay di na nya basahin uli pero need natin sya ipabasa uli di ba? So kailangan blank na ito ok.

Since na copy paste na natin ang mga liveMac mo before for rechecking sa MacGenList.txt mo balik na tayo sa wimax tool v3.0 makita mo na mag automatic may laman na ang i-Snipe mo at click snipe ka na lang deretso para mag re-check ito kung alin pa ang natirang live Macs.

Then punta ka sa Mac Gen/Hunter

Hayaang matapos ang rechecking ng live Macs mo at watch ka muna ng movie hihi. Makikita mo ang mga live macs mo sa LiveMac.txt after nya mag recheck.

Repeat lang ang procedure every time mag rechecking ka ng live pa na Macs sa case ko may mga live Macs pa na natira after a month ang yon ginamit ko till now buhay pa means stable Macs sya like picture below mga natirang live Macs na recheck ko.

```

```

kumunti na sya di ko na lang pinakita ang ibang live Macs na natira demo lang naman to mga bossing.

Sana makatulong to sa inyo paano mag check ng natirang LiveMacs nyo – [Neo rules!!!!](#) Peace.
