

Here is my newly compiled executable DV235t Mac Changer for Version 7 only (reboot Method NEW and OLD Mac Changer) *No need to manually change the NAI, Domain and domain password.*

1. Open your GUI and login to <https://192.168.15> at login kayo sa admin ninyo then administrator then telnet then check first box in telnet then save.

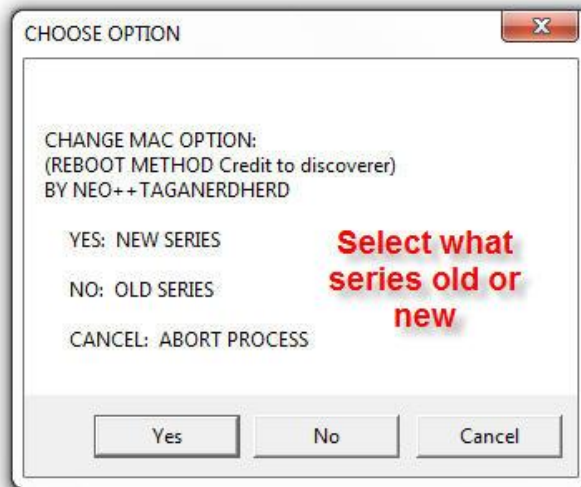

2. Open or run as administrator *NEODV235t V7 Mac Changer*. (Take note sometimes ang antivirus po ninyo ay i-detect po ito as VIRUS. Di po totoo yan ika nga false positive po yan. Di po ako namimigay ng virus hihhi peace close muna antivirus or allow this program but if you are in doubt, don't)

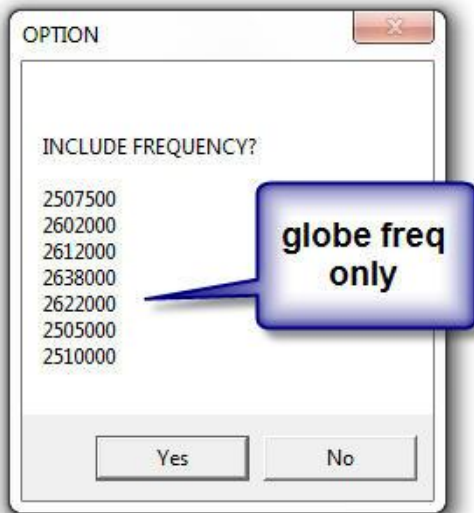

3. Put my password *matrix242*

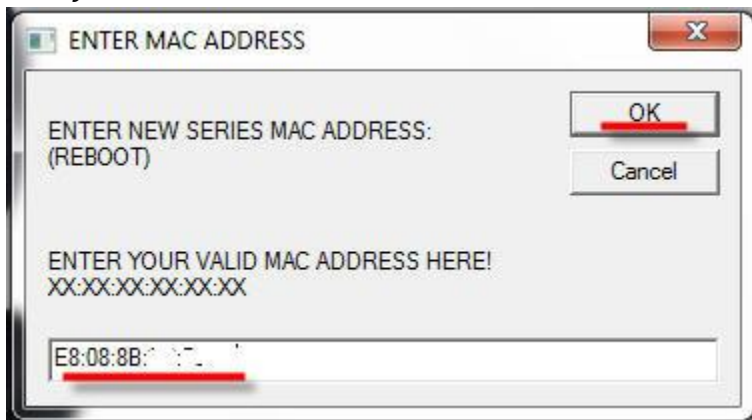

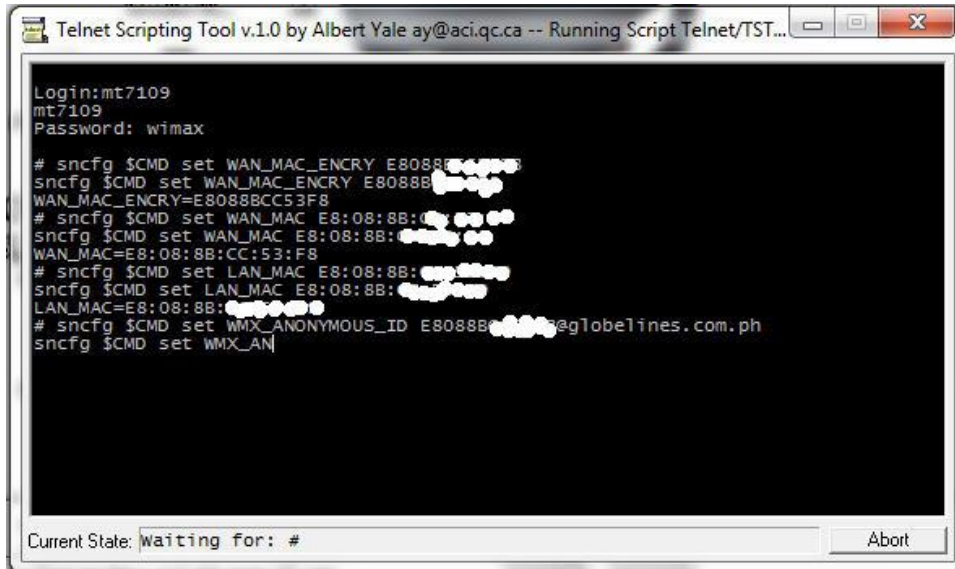

- 4.
- 5. *This next pop up is for globe frequencies only*

- 6. *Enter your new series Mac or old mac here*

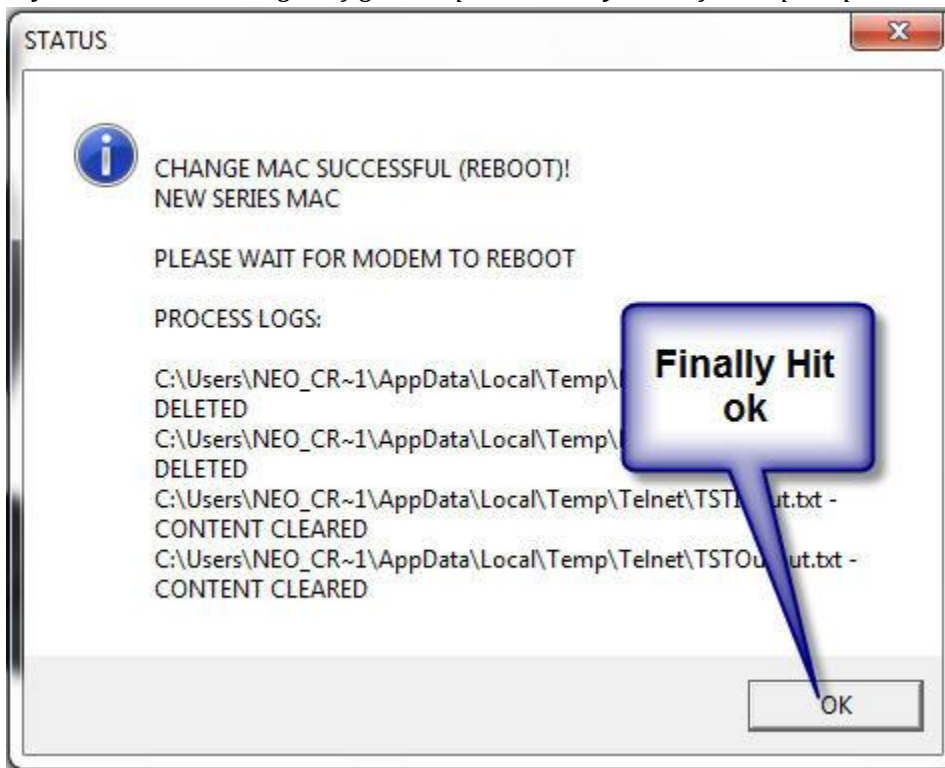

7. There should be a telnet pop-up here like image below

```
Telnet Scripting Tool v.1.0 by Albert Yale ay@aci.qc.ca -- Running Script Telnet/TST...
