

Bypass Smart or any Network throttling of torrents.

1. Download the appropriate installer for your windows:

Installer (32-bit), Windows XP and later

<http://swupdate.openvpn.org/community/releases/openvpn-install-2.3.4-I003-i686.exe>

Installer (64-bit), Windows XP and later

2. Restart Computer or Laptop in **safe mode**.
3. Install the OPENVPN
4. In your installation Directory (Usually in C:\Program Files\OpenVPN) locate the config folder and replace all with my config folder attached in this tutorial.
5. Right click the Config FOLDER and COPY (copy the folder). If your config folder in C:\Program Files\OpenVPN is not empty, just open it and delete all and replace it with my attached config folder.
6. The config folder should contains only these files

7. Then restart in normal mode
8. Open your antivirus and exclude the openVPN program for auto scanning these files. In my case I used avast antivirus like picture below

9. Then hit ok

10. Now you can run openVPN freely. Locate the openVPN in your desktop, right click on it and run as administrator.

11. You can find it near to your clock at the far right end

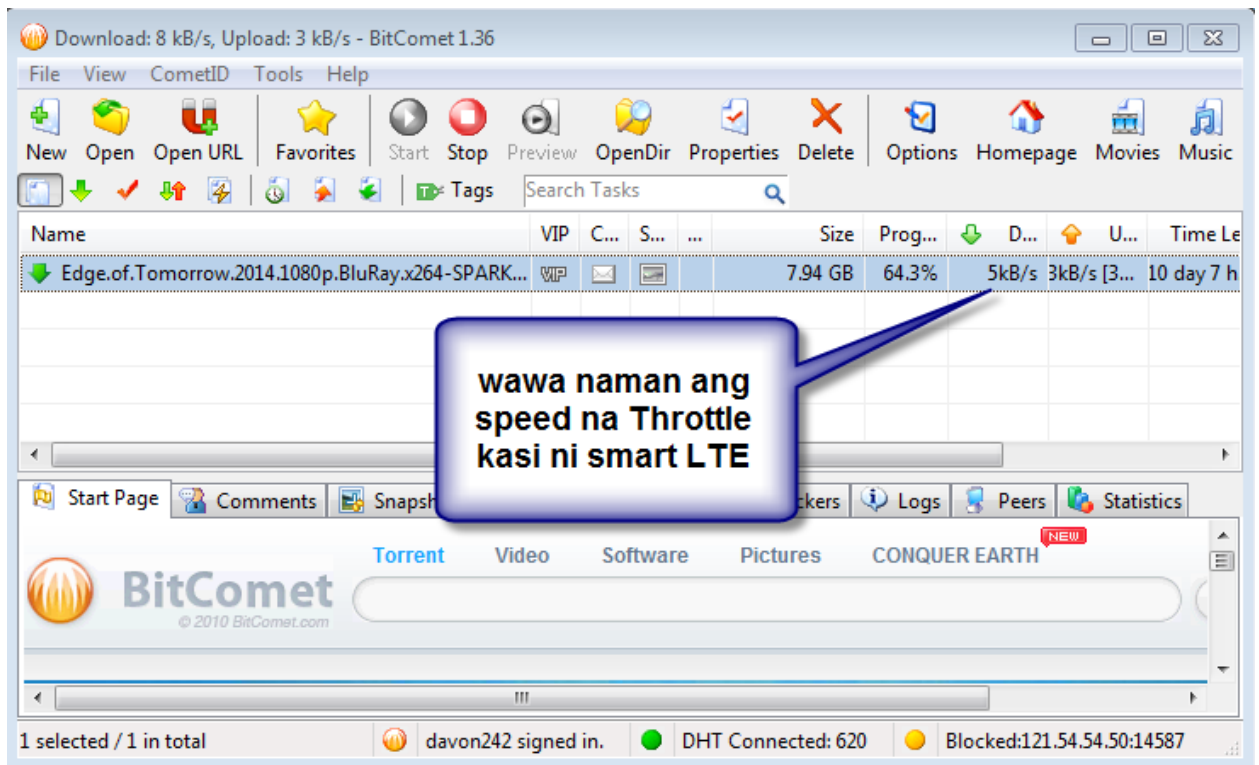

12. Wait for a moment it will process the connection without password authentication.
13. If connected you can see these result

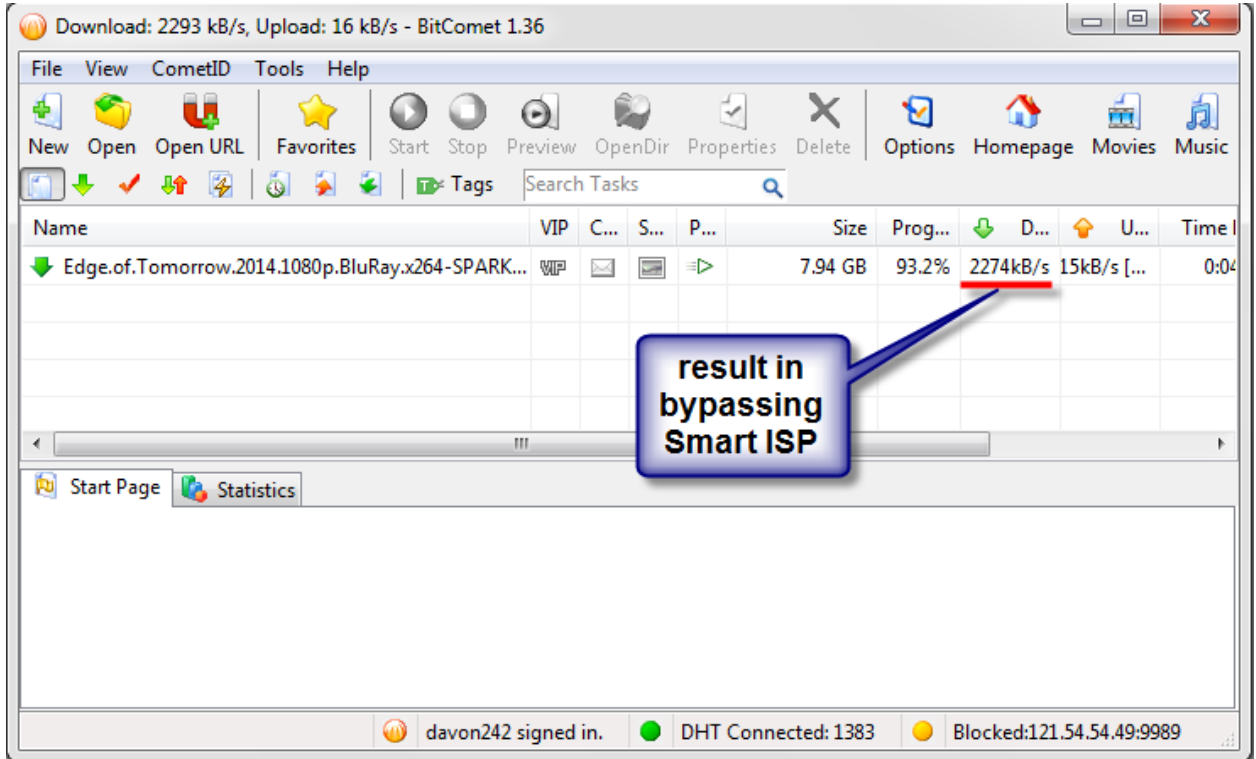

14. Start downloading your torrent. After an hour it will show you a satisfying results mine is this picture below. (using my smart LTE sim in B593s-22)

Before tunneling:

After an hour of tunneling:

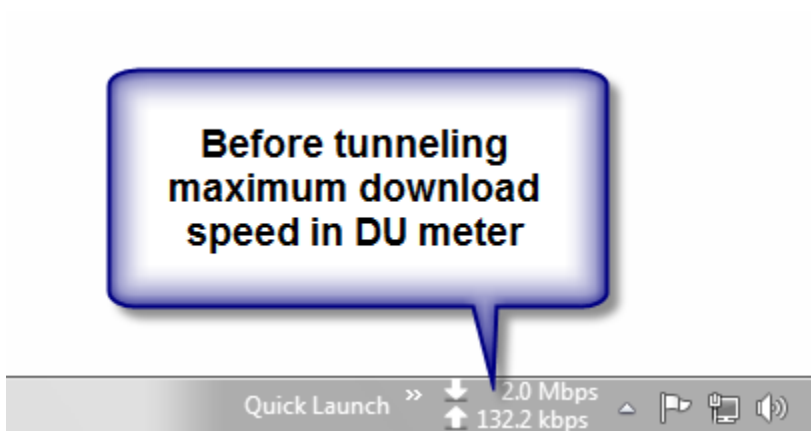

The screenshot shows the BitComet 1.36 interface. The title bar indicates "Download: 2293 kB/s, Upload: 16 kB/s - BitComet 1.36". The main window displays a list of tasks. A callout box points to the download speed of 2274kB/s for the file "Edge.of.Tomorrow.2014.1080p.BluRay.x264-SPARK...".

Name	VIP	C...	S...	P...	Size	Prog...	↓	D...	↑	U...	Time l
Edge.of.Tomorrow.2014.1080p.BluRay.x264-SPARK...	VIP	✉	📄	⇒	7.94 GB	93.2%	2274kB/s	15kB/s [...]			0:04

15. It is applicable also in globe wimax modems.

Bm622m before tunneling:

The screenshot shows a system tray with network speed indicators. A callout box points to the download speed of 2.0 Mbps.

**Before tunneling

16. Thank you for watching. I love to entertain you guyz hehehe. Peace To all taganerdherdians – NEO Rules

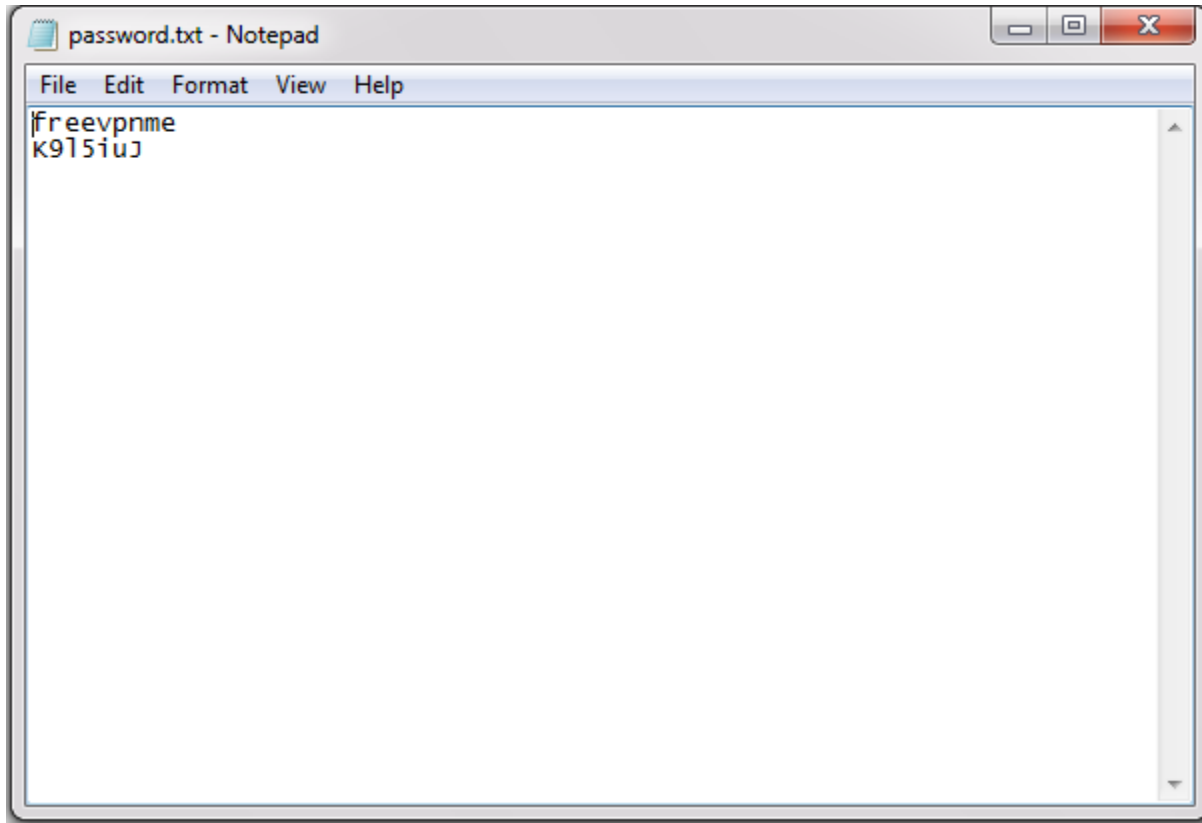

If you want to know the technique on how to auto password login just open ovpn in config folder with a notepad and edit this section.

A screenshot of a Notepad window titled "FreeVPN.me[Server2]-UDP-40000.ovpn - Notepad". The window contains the following text:

```

A blue callout box with the text "add this text" points to the underlined "password.txt" in the configuration file.

Then create a password.txt in the config folder containing the username and password like image below.

Now you are all set. No need to manually put your password. Once again feedback if you find time. For those Windows Tap adapter V9 blocked by the antivirus you can download it here

<http://www.driverscape.com/download/tap-win32-adapter-v9>

and reinstall it in safe mode.
